

A visit to the dentist? Don't forget your identity card!

A dental appointment? Always bring your identity cards: your own and your children's (eID, foreign national's card, Kids-ID or ISI+ card). It makes invoicing easier. With your ID card, in some cases you might not have to pay the full amount upfront, as your health insurance fund may provide direct reimbursement. Then you only pay the co-payment (= your personal contribution).
