

# ANNEXE IV - BIJLAGE IV

## Liste des codes ATC exclus de la forfaitarisation - Lijst van de ATC-codes die buiten het forfait vallen

|         |                                                         |                                                   |
|---------|---------------------------------------------------------|---------------------------------------------------|
| A05AX05 | Odevixibat                                              | Odevixibat                                        |
| A07AA04 | Streptomycine                                           | Streptomycine                                     |
| A07AA10 | Colistine                                               | Colistine                                         |
| A16AA04 | Mercaptamine (PROCYSBI)                                 | Mercaptamine (PROCYSBI)                           |
| A16AA05 | Acide carglumique                                       | Carglumaatzuur                                    |
| A16AA06 | Bétaine                                                 | Betaine                                           |
| A16AB02 | Imiglucérase                                            | Imiglucerase                                      |
| A16AB03 | Agalsidase alfa                                         | Agalsidase alfa                                   |
| A16AB04 | Agalsidase bêta                                         | Agalsidase bêta                                   |
| A16AB05 | Laronidase                                              | Laronidase                                        |
| A16AB07 | Alpha glucosidase                                       | Glucosidase alfa                                  |
| A16AB08 | Galsulfase                                              | Galsulfase                                        |
| A16AB09 | Idursulfase                                             | Idursulfase                                       |
| A16AB10 | Vélaglucérase alfa                                      | Velaglucerase alfa                                |
| A16AB20 | Pegunigalsidase alfa                                    | Pegunigalsidase alfa                              |
| A16AB22 | Avalglucosidase Alpha                                   | Avalglucosidase Alpha                             |
| A16AB26 | Eladocagene exuparvovec                                 | Eladocagene exuparvovec                           |
| A16AX04 | Nitisinone                                              | Nitisinon                                         |
| A16AX06 | Miglustat                                               | Miglustat                                         |
| A16AX07 | Saprotérine                                             | Saproterine                                       |
| A16AX08 | Teduglutide                                             | Teduglutide                                       |
| A16AX09 | Glycerol Phenylbutyrate                                 | Glycerol fenylbutyraat                            |
| A16AX10 | Eliglustat                                              | Eliglustat                                        |
| A16AX12 | Trientine                                               | Triëntine                                         |
| A16AX14 | Migalastat                                              | Migalastat                                        |
| A16AX15 | Telotristat                                             | Telotristat                                       |
| A16AX16 | Givosiran                                               | Givosiran                                         |
| A16AX18 | Lumasiran                                               | Lumasiran                                         |
|         |                                                         |                                                   |
| B01AB02 | Antithrombine III                                       | Antithrombine III                                 |
| B01AC09 | Epoprosténol                                            | Epoprostenol                                      |
| B01AC11 | Iloprost                                                | Iloprost                                          |
| B01AC27 | Selexipag                                               | Selexipag                                         |
| B01AD10 | Drotrecogine alpha                                      | Drotrecogine alfa                                 |
| B01AD12 | Protéine c                                              | Proteine c                                        |
| B01AX07 | Caplacizumab                                            | Caplacizumab                                      |
| B02AB01 | Aprotinine                                              | Aprotinine                                        |
| B02AB02 | Alfa-1 antitrypsine                                     | Alfa-1 antitrypsine                               |
| B02AB04 | Camostat                                                | Camostat                                          |
| B02BB01 | Fibrinogène humain                                      | Fibrinogene humaan                                |
| B02BC10 | Fibrinogène humain                                      | Fibrinogene humaan                                |
| B02BC30 | Thrombine humain et Fibrinogène humain                  | Thrombine en Fibrinogeen, humaan                  |
| B02BD01 | Facteurs de coagulation IX, II, VII et X en association | Coagulatiefactoren IX, II, VII en X in associatie |
| B02BD02 | Facteur VIII de coagulation                             | Coagulatiefactor VIII                             |
| B02BD03 | Facteur VIII inhibitor                                  | Factor VIII inhibitor                             |
| B02BD04 | Facteur IX de coagulation                               | Coagulatiefactor IX                               |
| B02BD05 | Facteur VIII de coagulation                             | Coagulatiefactor VIII                             |
| B02BD06 | Facteur von Willebrand et facteur VIII de coagulation   | Von willebrandfactor en coagulatiefactor VIII     |
| B02BD07 | Facteur XIII de coagulation                             | Coagulatiefactor XIII                             |

|         |                             |                              |
|---------|-----------------------------|------------------------------|
| B02BD08 | Eptacog alfa active         | Eptacog alfa                 |
| B02BD09 | Nonacog alfa                | Nonacog Alfa                 |
| B02BD10 | Facteur von Willebrand      | Von Willebrand factor        |
| B02BD14 | Susoctocog alfa             | Susoctocog alfa              |
| B02BD30 | Thrombine                   | Thrombine                    |
| B02BX04 | Romiplostim                 | Romiplostim                  |
| B02BX05 | Eltrombopag                 | Eltrombopag                  |
| B02BX06 | Emicizumab                  | Emicizumab                   |
| B02BX08 | Avatrombopag                | Avatrombopag                 |
| B03XA06 | Luspatercept                | Luspatercept                 |
| B05AA02 | Octaplas LG                 | Octaplas LG                  |
| B05XB02 | Glutamine d'alanyl          | alanylglutamine              |
| B06AB01 | Hématine                    | Hematine                     |
| B06AC01 | C1-inhibiteur               | C1-inhibitor                 |
| B06AC02 | Icatibant                   | Icatibant                    |
| B06AC05 | Lanadelumab                 | Lanadelumab                  |
| C02DA01 | Diazoxide                   | Diazoxide                    |
| C02KX01 | Bosentan                    | Bosentan                     |
| C02KX02 | Ambrisentan                 | Ambrisentan                  |
| C02KX03 | Sitaxentan                  | Sitaxentan                   |
| C02KX04 | Macitentan                  | Macitentan                   |
| C02KX05 | Riociguat                   | Riociguat                    |
| C03XA01 | Tolvaptan                   | Tolvaptan                    |
| C04AD03 | Pentoxifylline              | Pentoxifylline               |
| C04AX02 | Fenoxylbenzamine            | Fenoxylbenzamine             |
| D01AE21 | Flucytosine                 | Bromelaine                   |
| D03BA03 | Bromelaine                  | Flucytosine                  |
| D06BB10 | Imiquimod                   | Imiquimod                    |
| D11AH01 | Tacrolimus                  | Tacrolimus                   |
| D11AH02 | Pimécrolimus                | Pimecrolimus                 |
| D11AH05 | Dupilumab                   | Dupilumab                    |
| D11AH07 | Tralokinumab                | Tralokinumab                 |
| D11AH08 | Abrocitinib                 | Abrocitinib                  |
| G03HA01 | Cyprotéroneacétate          | Cyproteronacetaat            |
| G03XB01 | Mifépristone                | Mifepriston                  |
| G04BE03 | Sildénafil                  | Sildenafil                   |
| G04BE08 | Tadalafil                   | Tadalafil                    |
| H01AB01 | Thyrotrophine alpha         | Thyrotrofine alfa            |
| H01AC03 | Mécasermine                 | Mecasermine                  |
| H01AC08 | Somatrogon                  | Somatrogon                   |
| H01AX01 | Pegvisomant                 | Pegvisomant                  |
| H01BA02 | Desmopressine, -acétate     | Desmopressine, -acetaat      |
| H01BA04 | Terlipressine               | Terlipressine                |
| H01CA01 | Gonadoreline, -chlorhydrate | Gonadoreline, -hydrochloride |
| H01CB01 | Somatostatine               | Somatostatine                |
| H01CB02 | Octréotide                  | Ocreotide                    |
| H01CB03 | Lanréotide                  | Lanreotide                   |
| H01CB05 | Pasiréotide                 | Pasireotide                  |
| H03AA01 | Lévothyroxine (inj)         | Levothyroxine (inj)          |

|         |                                |                                |
|---------|--------------------------------|--------------------------------|
| H05AA02 | Teriparatide                   | Teriparatide                   |
| H05AA03 | Hormone parathyroïde           | Parathyroïd hormoon            |
| H05BX01 | Cinacalcet                     | Cinacalcet                     |
| H05BX04 | Etelcalcetide                  | Etelcalcetide                  |
| J01DF01 | Aztréonam                      | Aztreonam                      |
| J01GA01 | Streptomycine                  | Streptomycine                  |
| J01GB06 | Amikacine (ARIKAYCE LIPOSOMAL) | Amikacine (ARIKAYCE LIPOSOMAL) |
| J02AA01 | Amphotéricine                  | Amfotericine                   |
| J02AC03 | Voriconazole                   | Voriconazol                    |
| J02AC04 | Posaconazole                   | Posaconazole                   |
| J02AC05 | Isavuconazole                  | Isavuconazole                  |
| J02AX01 | Flucytosine                    | Flucytosine                    |
| J02AX04 | Caspofungine                   | Caspofungine                   |
| J02AX06 | Anidulafungine                 | Anidulafungine                 |
| J04AM01 | Streptomycine, associations    | Streptomycine, associaties     |
